Kiel, Germany

The name of this veterinary medicine is:

Drontal Cat XL Film-coated Tablets

What is in Drontal Cat XL Film-coated Tablets?

Each Drontal Cat XL Film-coated Tablet is a scored white to yellowish tablet containing two active substances: 30mg praziquantel and 345mg pyrantel embonate. Each tablet also contains 2.6mg of a colouring agent called.

What is Drontal Cat XL Film-coated Tablets used for?

Drontal Cat XL Film-coated Tablets can be used to treat roundworms and tapeworms commonly found in cats in the UK and Ireland. The product is effective against the following types of roundworm and tapeworm: *Toxocara cati*, *Toxascaris leonina*, *Dipylidium caninum*, *Taenia taeniaeformis*.

Roundworms and tapeworms are parasites that live in the gut. If left untreated they can cause your cat to become unwell. Treating your cat regularly will reduce the risk of other animals and humans being exposed to worm infections.

Do not give Drontal Cat XL Film-coated Tablets:

- If your cat is receiving other medicines containing piperazine.
- If your cat is pregnant.
- To kittens under 6 weeks of age.

Possible side effects

There are no known side effects. If you notice any serious side effects please consult your veterinary surgeon.

Target species

This veterinary medicine is for use in cats.

DOSAGE

How many tablets should I give to my cat?

The number of tablets needed to treat your cat depends on your cat's weight. Give 1 tablet for every 6kg (13lb 4oz) bodyweight.

If your cat weighs less than 6kg (13lbs 4oz), you can use Drontal Cat Film-coated tablets, which are intended for use in smaller cats.

How do I give Drontal Cat XL Film-coated Tablets?

Give the tablets to your cat by placing directly in the cat's mouth but, if necessary, hide the medicine in the cat's food.

How to store Drontal Cat XL Film-coated Tablets

- Keep out of reach and sight of children.
- Do not store above 25 degrees C.
- Do not remove tablets from the foil strip until they are required for use.
- Dispose of any unused half tablets. Do not keep them for future use.
- Store in the original packaging.
- Do not use after the expiry date stated on the foil strip and outer packaging.

Special warnings

For Animal Treatment Only

- Your cat can become infected with tapeworms by eating fleas, mice or other small rodents. If fleas are not controlled or if your cat often hunts it may become re-infected with worms.
- If your cat has been taken overseas, it is recommended that they are treated with a veterinary medicine containing praziquantel (eg Drontal Cat Film-coated Tablets) before entering the UK or Ireland.

User warnings

Always wash your hands after giving your cat Drontal Cat XL Film-coated Tablets.

Disposing of unwanted Drontal Cat XL Film-coated Tablets

Dispose of empty packaging and any remaining product in the household refuse.
